

# BEVEL DINING TABLE

by CHRISTOPHER FLECHTNER  
for CRAFTSMAN + COLLECTIVE

The BEVEL dining tables' carved details create an elegant contrast between its bold angular legs and slender looking top. An engineered torsion-box design allows for a strong and stable top surface while removing weight and minimizing the natural tendency for wood to move and warp over time. The table' s solid wood legs attach with a hidden connection that allows for the table to ship flat for lower shipping costs as well as less impact on our planet. A future heirloom, the BEVEL dining table utilizes the finest materials, the highest level of craft and the most careful engineering to ensure that it will age gracefully for years to come and eventually take on its own unique personality within your home.
